Follow your intuition.
All the magic is inside of you.
It's your time to shine!

You have been manifesting all your life.
From the friends you have to the car you drive.

All come from the path you've taken.

Did you feel guided?

Questions to ask yourself:

1. Did you feel that "things just worked out" for you?
2. In hindsight, do you see how one thing led to another, Were you compelled to take certain actions which ultimately led you to completing your goal?
3. Was your goal something you thought about before it materialized? How did it feel thinking about it?
